**Aburrá • Oriente**

# Preventive Safety Culture Policy and Occupational Health

Concesión Túnel Aburrá Oriente

**Approval:** May 24, 2023  
Version 3

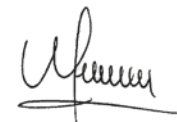

We are the **Concesión Túnel Aburrá Oriente S.A (Aburrá Oriente Tunnel Concession SA)** in charge of the construction, operation and maintenance of the Aburrá Oriente Tunnel, which connects the Aburrá and San Nicolás valleys, the most economically dynamic subregions in Antioquia. Likewise, we are in charge of the operation and maintenance of the Las Palmas Bypass, Santa Elena and Las Palmas two-lane road.

At **Concesión Túnel Aburrá Oriente S.A.** we recognize the importance of human capital and we are committed from the highest level of leadership of the organization to:

- **Identify, evaluate, assess and prioritize hazards** in order to prevent occupational injuries and illnesses through the control of unacceptable risks associated with our activities.
- **Promote a culture of safety and prevention through identification**, timely notification and efficient controls for the dangerous conditions that may lead to negative consequences for the collaborators and the organization.
- **Comply with current applicable national regulations** regarding occupational risks, according to our economic activity.
- **Perform permanent measurement of SG-SST (Occupational Health and Safety)** results in order to verify compliance with the objectives and strive for the continuous improvement of the System.
- **Allocate and maintain the human, technical, physical and financial resources** necessary to achieve the objectives and goals proposed in the Occupational Health and Safety System.

**The commitments acquired by the organization involve our collaborators**, regardless of their contract type or involvement, including contractors and subcontractors, providing a safe and healthy environment and who will have the responsibility to comply with this policy, through participation and commitment, performing safe work in alignment with the following premises in **preventive culture for health and safety at work 24/7:**

- 1 If the task to be executed **is not safe, we will make it safe.** The tasks must be executed **under controlled risk conditions.**
- 2 Every incident or accident at work **can be prevented.**
- 3 Safety **and health at work** must be **a value**, not just a priority.
- 4 **Stopping a job when a risk** is identified is both **a responsibility and a duty.**
- 5 **Act** together to **build a preventive health and safety culture**, 24 hours a day, 7 days a week.
